

Specially designed and made in a range of sizes to ensure a better seal and fit for each wearer

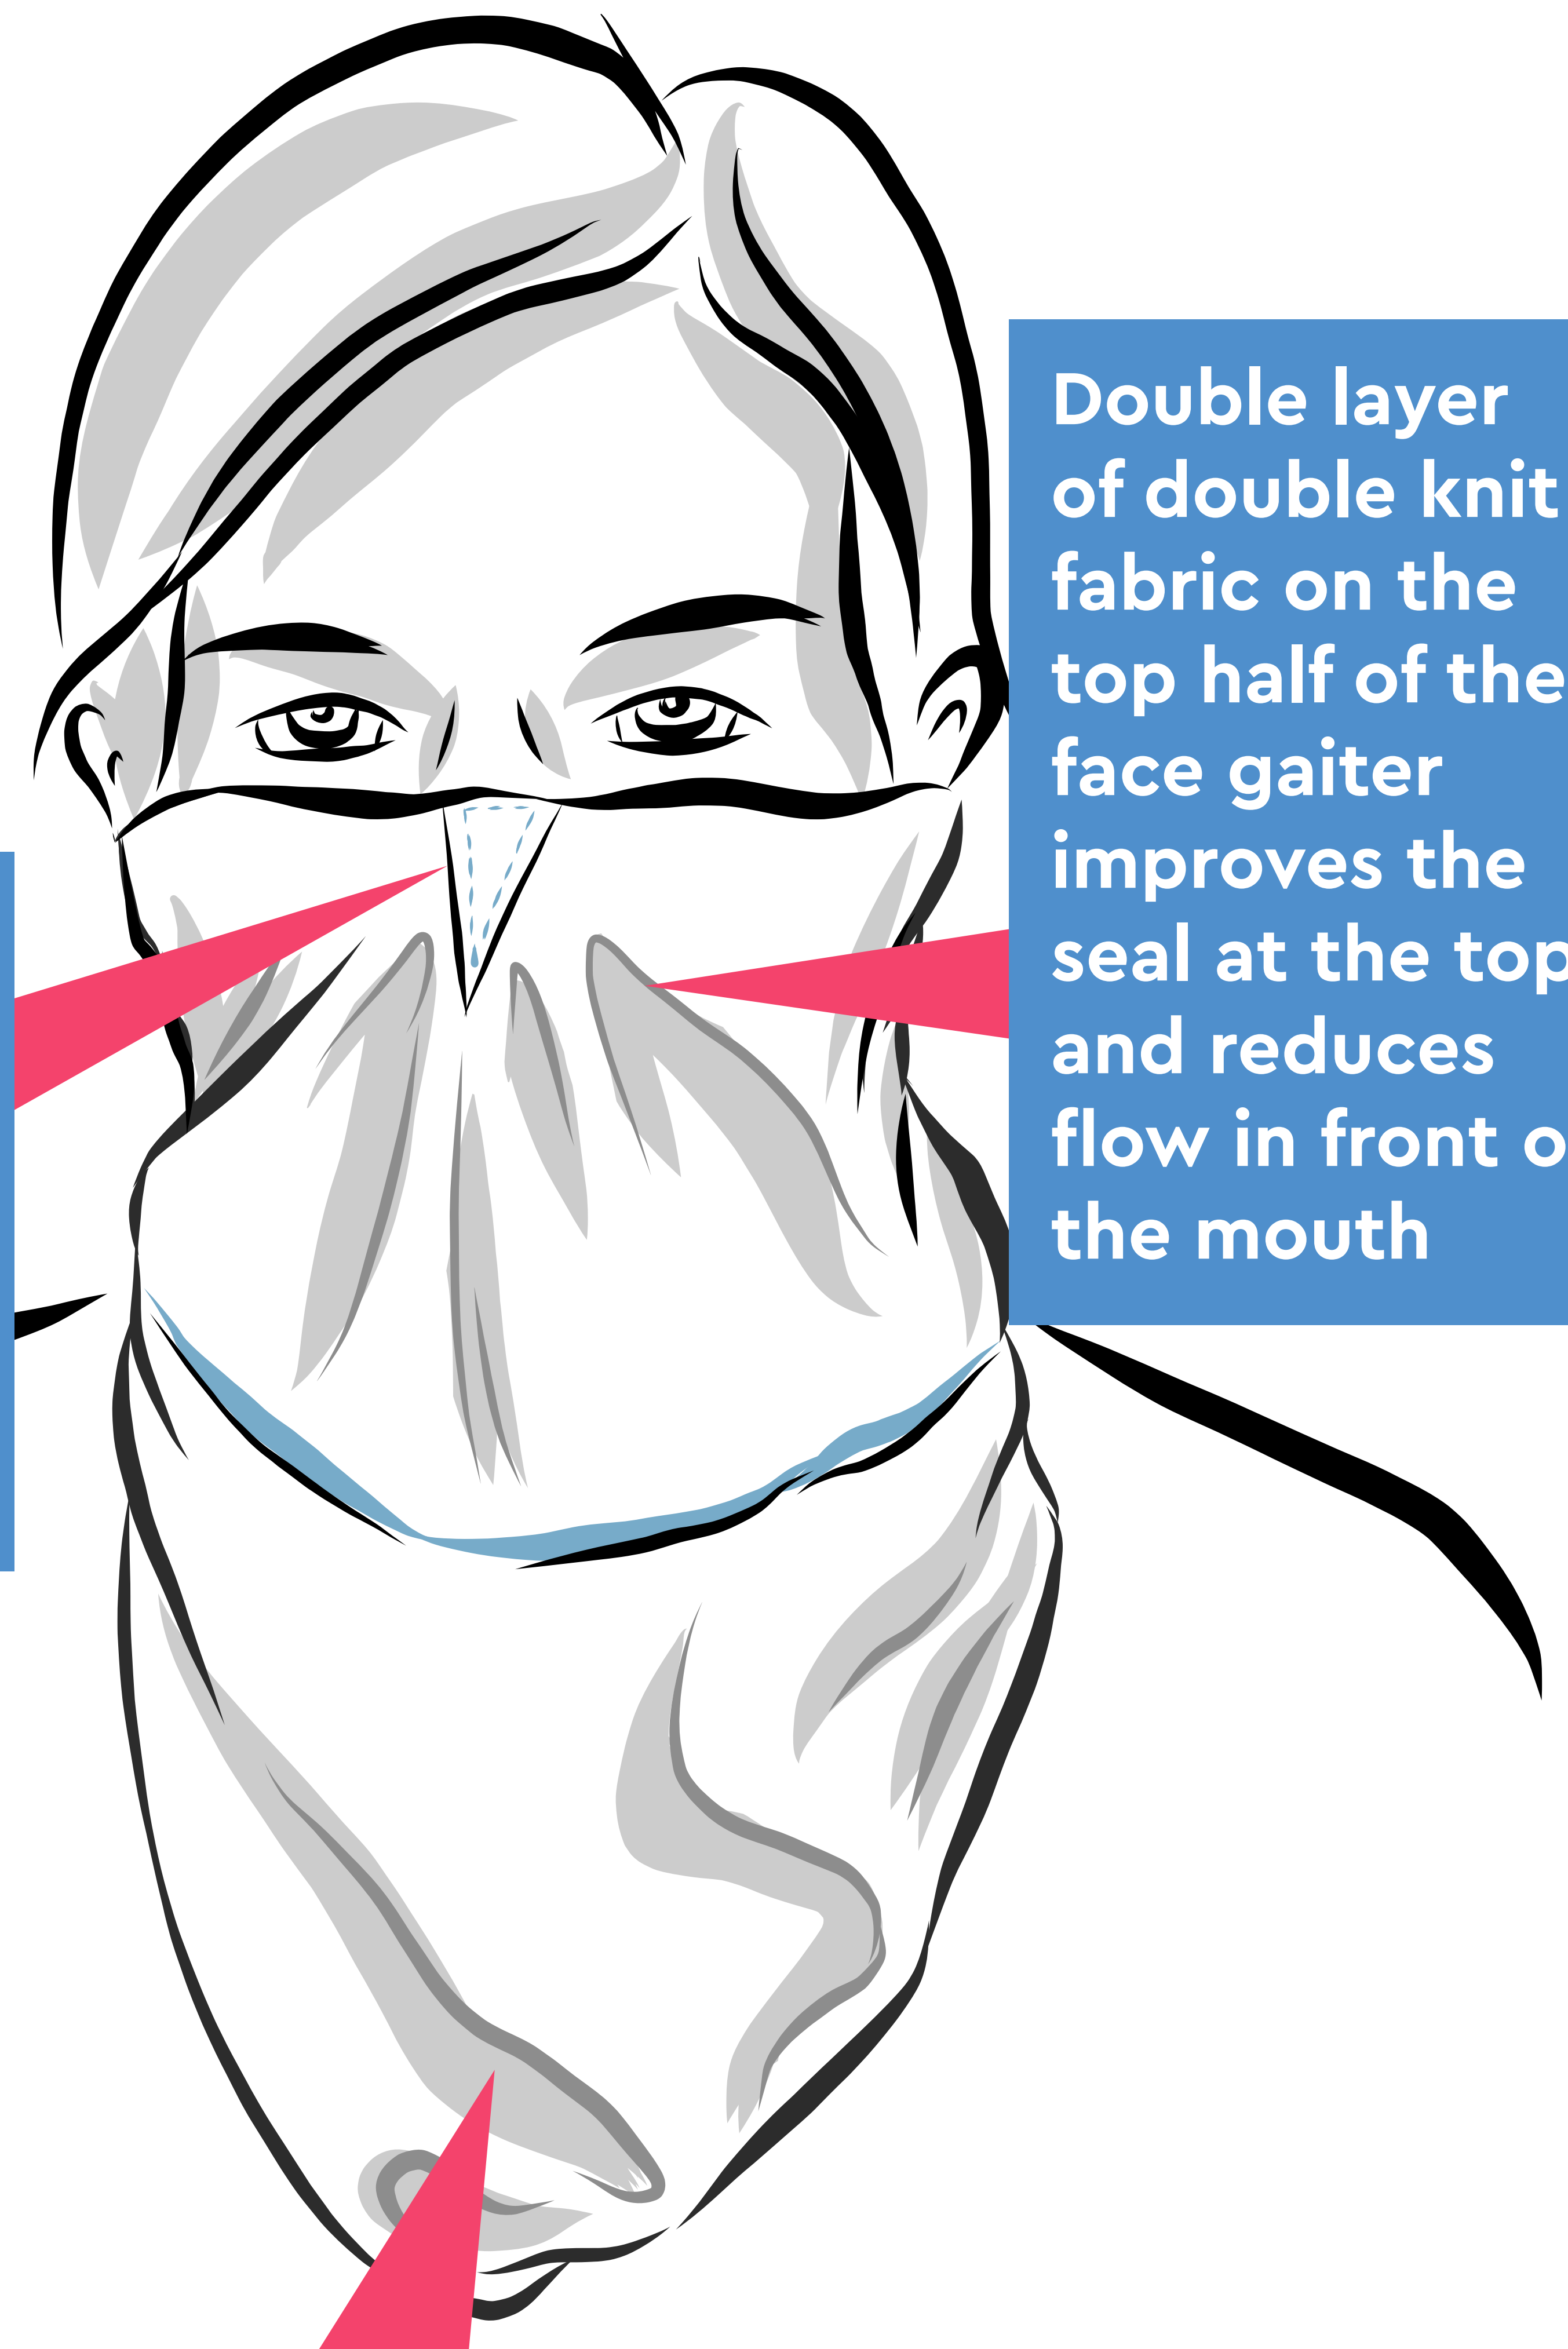

Shaping in front of the mouth directs air towards the neck

Shaped bottom edge allows it to create a seal with your clothes.

Stretch fabric allows for user comfort and creates a seal around the face.

Nose section creates space between the mouth and fabric to allow exhaled air to disperse

Double layer of double knit fabric on the top half of the face gaiter improves the seal at the top and reduces flow in front of the mouth

Single layer fabric in lower half reduces resistance to allow additional airflow.
